## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of group I in the reply filed on 2/9/07 is acknowledged.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1 and 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, claim 1 seems to lack the elements needed to make the instantly claimed compounds of formula (I). Step a) has (IIIa) or (IIIb) + metallated alkane -> ylide + (IIIc) -> (I) since step (b) is optionally, then the step a) must make formula (I) and step a) is missing steps to make the final product. Further words like "reacting", "converting" and "converting" lack essential steps needed to make the final products.

Also, steps (d) and others are performed "if desired". Are these steps necessary? Or needed? What is (IIIh), (Ia) and (b)? Clarification is required.

*Allowable Subject Matter*

5. The closest art is Horiuchi (US Patent 7064209), Storz (US 6909003), Hara (US 6965031), Niddam (6528661) and Chen (6835838) which teach methods of making compounds of the instant formula (I) by a different route than is instantly claimed.
